Continuation of Substance of Interview including description of the general nature of what was discussed:

In Applicant's most recent Amendment of 23 March 2009, there was confusion as to which amended specification was last entered. Applicant has withdrawn the amended specification of 27 October 2008, under the impression that only certain paragraphs of the amended specification of 29 April 2008 were entered and other paragraphs were not entered. Then Applicant further amended the specification, however, it is unclear now which specification the most recent amendments are addressing. Furthermore, it is unclear which specification the amended claims of 27 October 2008 are intended to reflect.

An interview was initiated in an effort to clarify the record. All of the amended specification of 29 April 2008 has not been entered. The amended specification of 27 October 2008 is considered also not entered. Applicant was informed of the current status. Applicant was advised that any amendments filed to the specification or to the claims from hereon should be in reference to the original specification of 24 September 2003. The Examiner informed the Applicant that a Notice of Non-Compliant would be forwarded in order to remedy these issues with respect to the specification amendment.

Also, the Examiner discussed how 35 USC §101 was being applied to the claims in view of Bilski. Search terms for acquiring the CAFC decision online were provided.

Possible new matter issues were discussed as well.
